

# Displaced Households and Short-Term Sheltering: Hurricane Dennis

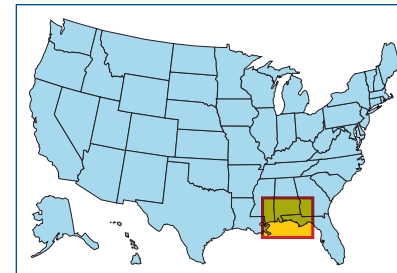

## POTENTIAL USES

- (Pre-event) update inventory of evacuation shelters
- Use with Quick Assessment Report to estimate number and location of displaced households and people who require short-term shelter due to wind damage
- Combine with SLOSH/surge analysis to identify additional households potentially displaced by flooding.
- Use analysis to scale the size of the housing recovery mission; identify housing support strategies; and determine the level of staffing to support the mission.

## Confidence Level in Analysis:

Moderate to High

## DATA AND ANALYSIS DISPLAYED:

- Storm track
- Location and concentrations of displaced households
- Location and concentrations of short-term shelters
